

# Tate Early Learning

---

*Earliest possible behavioral intervention for children at risk for Autism*

**Are you concerned your baby or toddler may have Autism?  
Are you waiting for an assessment or intensive services?**

Has your child's doctor or another child development professional raised concerns about your child's delayed milestones?

Many children wait months for formal assessment and intensive services.

**You can do something to help your child right now.**

**Our 6-week pilot program runs July 16 - August 24, 2018.**

**Tate Early Learning is a FREE in-home ABA parent consultation program** for infants and toddlers showing early signs of potential Autism and waiting for a formal assessment or intensive intervention.

Experts recommend starting evidence-based behavioral interventions as early as possible.

Applied Behavior Analysis (ABA) is the most well-researched intervention for Autism. We can help you increase your child's social engagement, language, and play skills, and help with challenging child behaviors. Services take place in your home twice a week for 6 weeks.

**There are no fees and insurance is not required. Apply today!**
